NEWSLETTER SEPTEMBER 2017

Our Mission

Sure Growth Technologies Inc. is a group of professional consultants dedicated to helping growers utilize scarce resources by implementing the best agronomy, precision farming, data management, and strategic farm planning.

Our Vision

Our unique ability to help top producers leverage innovation, technology, and alternative crops to increase profitability. We have the most experience at understanding the challenges that progressive growers deal with every day. We strive to implement strategic coaching to simplify and minimize input while maximizing output. We take pride in helping our clients build sustainable farm legacies.

Current Updates

As the season comes to its busiest time of year, we shift our thoughts from scouting to harvest. Our late infestation of Diamondback Larvae and Bertha Army worms took everyone by surprise and is no longer a concern as Canola is ripening. As crops being to come off the field, our agronomist are getting eager to start soil sampling to help you with your 2018 Crop year plans!

Agronomy Updates

Soil sampling is an essential tool as it helps determine the necessary inputs required for production on your farm for the upcoming coming season. It is a necessary process to help ensure you apply enough fertilizer to meet the requirements of your crops. Sampling also helps you take advantage of the nutrients already present in the soil to optimize your fertilizer application.

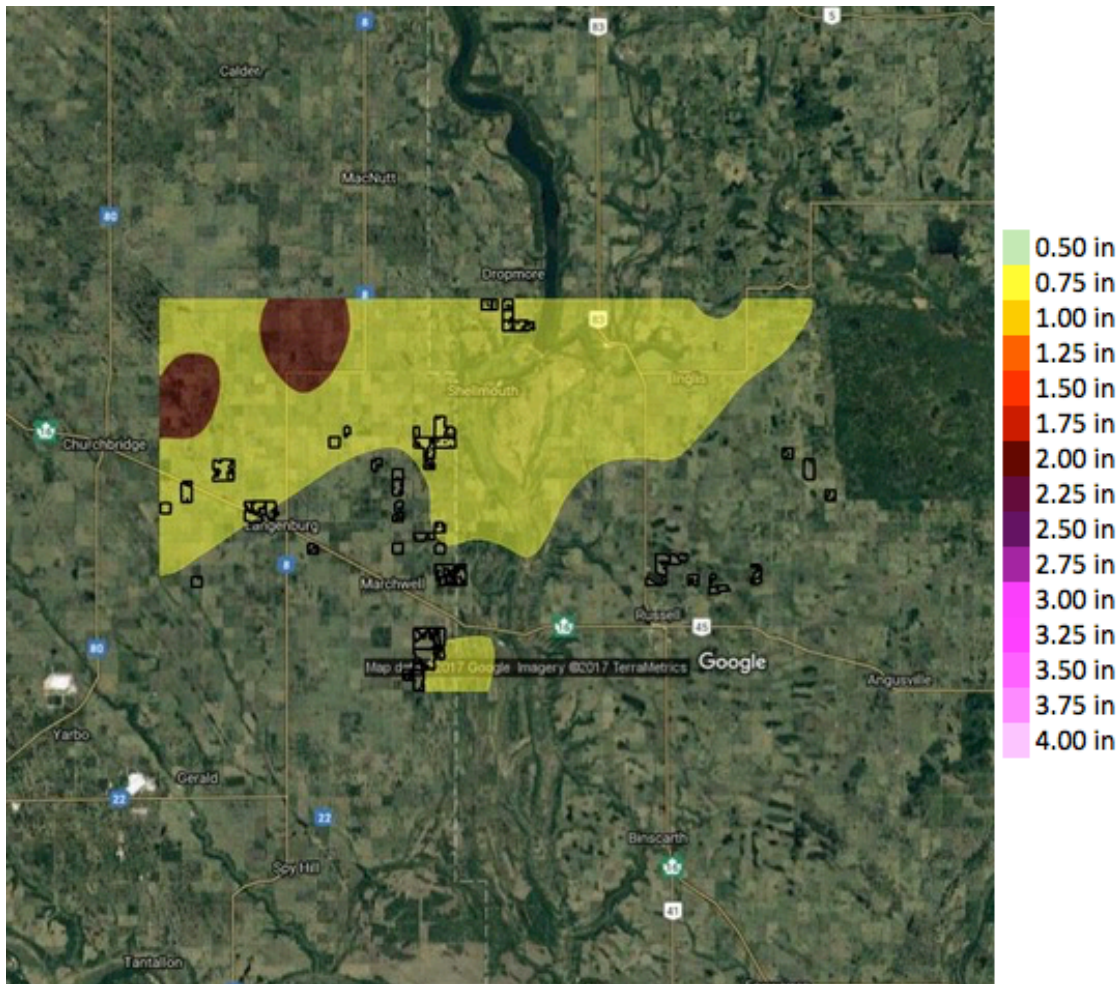

Yield results have been coming in and, for the most part, crops have been doing very well this year! After a crop year like we are having it is especially important to know what nutrients are in your soil, as your crops may have used additional nutrients to produce their yield. Soil sampling can help identify what nutrients and how much of those nutrients are required for 2018 to help reach your target 2018 yield!

Suregrowth is growing for the 2018 season, however, we are always excited to find new clients and provide them a premium service. Our services and advice include, but are not limited, to Strategic Crop planning, Precision Farming, Yield Data Cleanup and Management, GIS, Crop Scouting and Soil Sampling. Please get in touch with us if you would like any additional information or require any precision agronomy or data management help.

Hail Alert

There has been a hail event in your area.

Trimble Ag Software Feature

Agri-Trend and Trimble Ag Software offer growers access to Premium Weather, giving them the benefit and advantage of field precision weather data without the hassle of physical rain gauges and expensive in-field hardware.

Premium Weather's Hail Alert feather sends you timely emails when your farmland may have been hit by a hail event. Hail maps overlaid on your fields show you the precise location and size of hail. This information can save you time and money when scouting fields to assess damage.

Suregrowth team is continuing to update our clients with a monthly newsletter, however, Courtney will be taking over this responsibility for Baljeet. If you have something interesting that you would like to share with the other growers and our team, please feel free to let us know! You can email Courtney at ctuck@AGPL.

learn, please feel free to let us know! You can email Courtney at cluck@AGRI-TREND.com or reach her on her cellphone at 1(306)229-3616

We would like to wish everyone a safe harvest this season and that everyone is prosperous!

Upcoming Events/ Training Opportunities

- Winter Training | December 5th-6th, 2017 | Hyatt Regency, Calgary AB
- Farm Forum Event | December 6th-8th, 2017 | Telus Convention Center, Calgary AB
